

TTS PERFORMANCE.

HONDA CIVIC TYPE R (EP3) STAGE 3 SUPERCHARGER CONVERSION

AIRCON IS NOT VIABLE

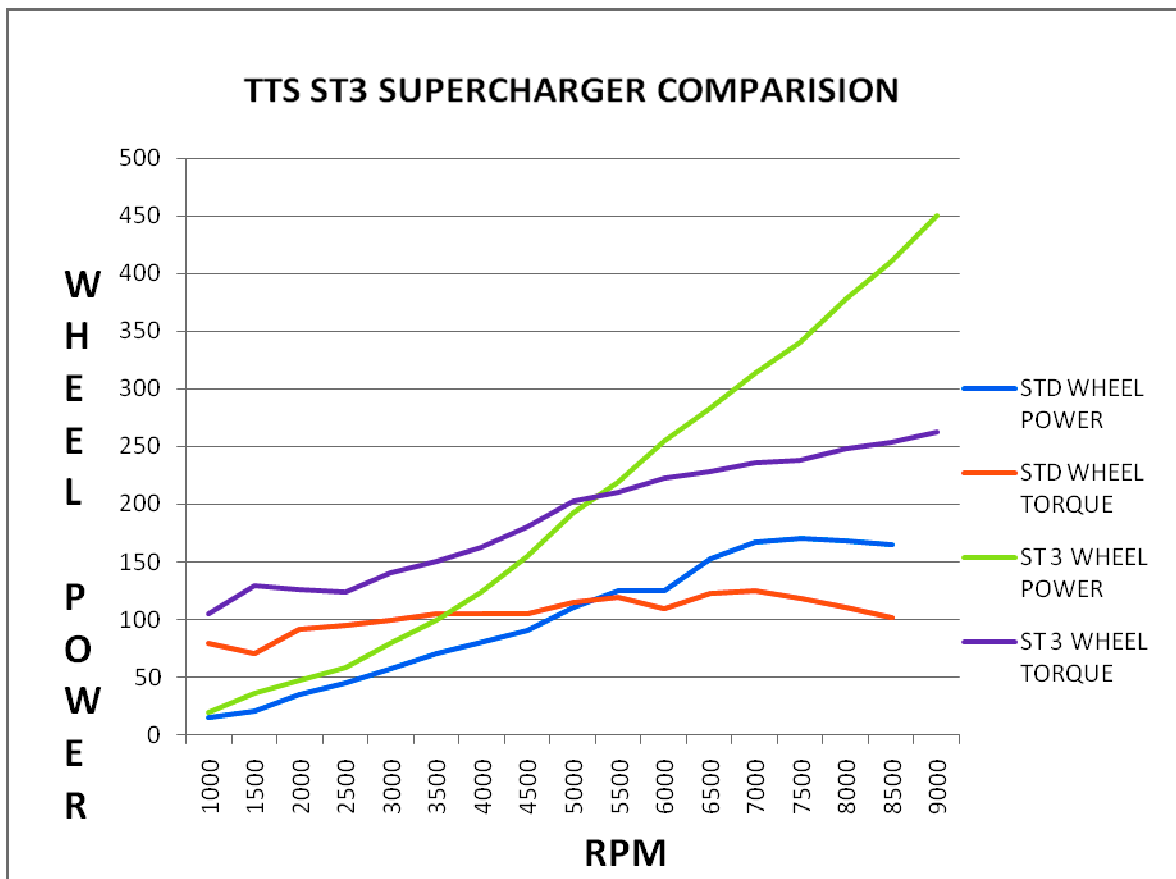

£5700+vat

TTS PERFORMANCE have developed this superb supercharger conversion to give you a 150%** plus power gain and give you better drivability then the standard car. This conversion is phenomenal, even with this incredible power output the car can be driven sedately with no fuss and will pull hard through its entire power band without glitches or fuss and no throttle lag, just seamless power with an astonishing top end charge. This conversion requires very little maintenance, utilising the genuine Honda belt tensioning system means OEM reliability. The front mounted intercooler maximises the cooling of the intake charge temperature, giving fantastic performance. This conversion is completed by a high performance radiator that forms an integral part of the conversion. This conversion outperforms all other commercially available supercharger conversions on the market. This conversion requires a comprehensive upgrade of engine and transmission. This conversion requires the Hondata K-pro ECU to complement the installation.

AEM water/methanol injection is essential with this conversion, please call to discuss.

97 octane Fuel Minimum. Plus Power Pour octane booster.

THIS CONVERSION SHOULD BE TREATED WITH RESPECT. ALTHOUGH IT TRANSMITS THE MOST CIVILISED POWER AVAILABLE YOU SHOULD TAKE TIME TO ACUSTOM YOURSELF TO ITS PERFORMANCE.

Performance:-

420+ WHEEL BHP, 250+ LB.FT TORQUE

0-60 in less than 5 seconds

0-100 in less than 10 seconds

¼ mile in less than 12.0 seconds

180+mph top speed

PARTS LIST
